

ESCUBE® UNIVERSAL & UNIVERSAL^{PRO}

Maximum vitality of grass even under climatic stress

All-in-one liquid preparation for maintenance and revitalization of grass. ESCUBE UNIVERSAL (5l) is for individual maintenance of private lawns and gardens and ESCUBE UNIVERSAL^{PRO} (10l) is for professional maintenance of sport fields, golf courses and city greens.

Escube contains:

- Microcarriers for controlled release of nutrients and elements (Fe, Mg)
- Biostimulants for enhanced germination, offsetting and root system enlargement
- Hydroabsorbents and wetting agents
- Compost leachette

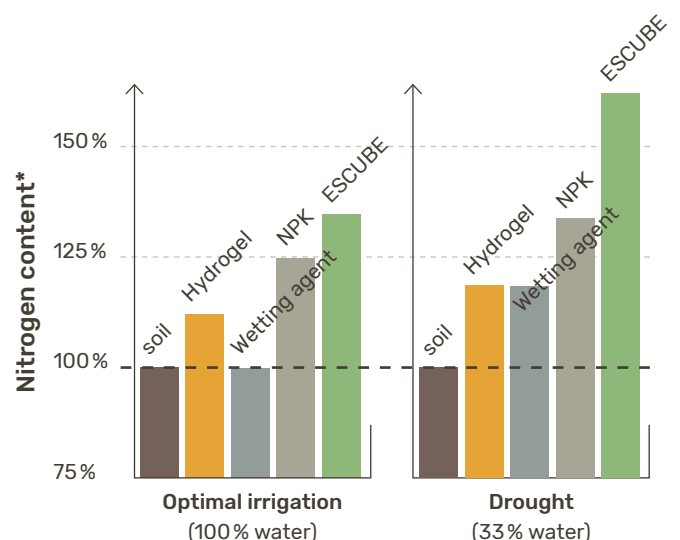

Escube is completely biodegradable with components digested by soil microorganisms in 30 to 90 days without environmentally harmful residues.

Fresh grass even under dry conditions

Practical tests by users confirmed superior efficacy of Escube in fairway maintenance even without irrigation. Photo shows untreated fairway and fairway once sprayed at the beginning of July. Photo taken October 2, 2019.

*Green color is proportional to nitrogen content

Recommended directions for use

ESCUBE® UNIVERSAL

 > 1x in 3 months >  5l +  5l =  100 m²

 > 1x in 1 month >  2,5l +  7,5l =  100 m²

After application, water the lawn to ensure removal of the preparation from the leaves and its infiltration into the soil. For best results, repeat watering in 24 hours to transport the compounds to the grass roots.

Declared nutrient content

Total nitrogen 2.0%, nitrate nitrogen min. 1.5% and ammonium nitrogen min. 0.5%, phosphate as P₂O₅ 1.0%, potassium as K₂O min. 3.0%, Fe (0.3% in EDTA chelate) and traces of Mg, Mn, Zn a B. Product contains mixture of natural superabsorbents and hygroscopic substances, vermi nezymes, and humins, pH = 6.0–6.5. Content of hazardous elements is below the legally set limits (mg/kg): Cd 1; Hg 1; Pb 8; As 20; Cr 50.

ESCUBE® UNIVERSAL^{PRO}

 > 1x in 3 months >  10l +  500l =  2 ha
 1/2 □ (5l) + ◊ 250l =  1 ha

 > 1x in 1 month >  5l +  500l =  2 ha
 1/4 □ (2,5l) + ◊ 250l =  1 ha

Dilute with water in respect to the frequency of applications and needs of the grass. For best results, apply onto wet grass or before the rain.

Declared nutrient content

Total nitrogen 3.0%, nitrate nitrogen min. 2.0% and ammonium nitrogen min. 1.0%, phosphate as P₂O₅ 1.0%, potassium as K₂O min. 3.5%, Mg (0.01%), Mn (0.01%) Fe (0.7% in EDTA chelate) and traces of Se, Mo, Zn and Cu. Product contains mixture of natural superabsorbents and hygroscopic substances, vermi nezymes and humins, pH = 6.0–6.5. Content of hazardous elements is below the legally set limits (mg/kg): Cd 1; Hg 1; Pb 8; As 20; Cr 50.
